1. Each participant group should include no more than five members. Individual participants can team up freely, but every one can only join one group and cannot enter the competition repeatedly.

2. Entries must be completed independently. No cheating or infringement of intellectual property is allowed. Entrants failing in doing so will be disqualified.

3. Projects must be built on Bytom ecosystem or Bytom smart contract.

4. Entrants submit project based on Bytom. After being

reviewed by the Organizing Committee, it will be selected to enter the competition for further improvement.

5. Before entry submission is closed, entrants can keep improving their works, but cannot change the topic. The final entry should be based on the latest version submitted before the submission deadline.(If there are important reasons that cannot be submitted before the deadline, please contact the official in advance, but no later than Nov.3, so as not to affect the official final list.)

6. Entries must be submitted in the prescribed form. Otherwise they will be phased out directly.Please upload your codes on GitHub.

7.Anyone belonging to the organizers of the Event and members of judgement cannot take part in the competition.

Judging Rules

Blockchain Adoption

All entries must be built on Bytom smart contracts while fully embodying the value and advantage of Blockchain technology and proving that the Blockchain technology is definitely irreplaceable when compared with the solutions based on the traditional technology.

Technology Implementation

The smart contract projects should feature rational design and complete functional design. Its stable operation is absolutely a guarantee for efficiency and quality. Moreover, it is designed with sufficient safety and protection mechanism.

Commercial Value

If entries presents great commercial value, they can be commercialized directly as representatives of industry application for potential profitability.

Creativity

Compared with those mature solutions in the industry, entries should illustrate innovation and creativity with better performance.

Product Design

The interactive design should be reasonable so that customers can easily understand and use, thus achieving a better user experience.
